

Contact Book System Features

User Roles

Super Admin

- Manages **user accounts** (admin/normal users).
- Full access to **all contacts** in the system.
- Can generate **global reports** (stats about all contacts).

Normal User

- Logs in with **username + password**.
 - Can **only manage their own contacts** (private contact book).
 - Can search, edit, and delete only their contacts.
-

Core Features (to match the other two projects)

Authentication & Access Control

1. **Super Admin login** (hardcoded, e.g., `admin/admin123`).
 2. **User login** (created by admin).
 3. **Role-based dashboard:**
 - Super Admin → system-wide control.
 - User → only their personal contact book.
-

User Management (Super Admin only)

4. Create User Account (username, password).

5. Edit User Account (reset password).
 6. Delete User Account.
 7. List All Users.
-

Contact Management (Per User)

8. Add Contact (name, phone, email, address, tags).
 9. Edit Contact.
 10. Delete Contact.
 11. Search Contact (by name, phone, or tag).
 12. List All Contacts (for that user).
-

Advanced Features

13. Import/Export Contacts (JSON or CSV file).
 14. Favorite Contacts (mark/unmark as favorite).
 15. Group Contacts (e.g., "Family", "Friends", "Work").
 16. Share Contact with Another User (optional).
 17. Duplicate Contact Detection (prevent same number/email being stored twice).
 18. Recent Contacts Log (last 5 contacts added/edited).
-

Reports & Statistics

19. Total number of contacts per user.
20. Number of contacts by group (family/friends/work).

21. Most frequently used contact (track calls/messages count — simulated with increments).

22. Global contact stats (super admin only):

- Which user has the most contacts.
- Most common tag/group across users.
- Total system-wide contacts.

Menu Structure

Login Screen

===== Contact Management System =====

1. Login as Admin
2. Login as User
